GREATER LOS ANGELES

SATURDAY, NOVEMBER 17, 2018

CRESCENT BAY PARK - Santa Monica, CA

Check-In 9:00am | Walk Ceremony at 10:00am

The MG Walk Campaign is the flagship national awareness and fundraising campaign for the Myasthenia Gravis Foundation of America (MGFA). Since its launch, the **MG Walk has raised a remarkable $5 million** to help fund research toward a cure, better treatments, much needed programs and services, education and awareness to the public and an increase in advocacy efforts.

WHAT IS MG? MG is a rare and chronic neuromuscular autoimmune disease affecting tens of thousands of people. The MG Walk Campaign continues to bring those in the MG Community to talk about their experience – many for the first time – and grow the resources and awareness desperately needed. While there are treatments, there is currently no cure for MG...and THAT is why we walk together toward the ultimate finish line...**a world without myasthenia gravis!**

"The MG Walk represents opportunity for everyone affected by MG to get involved, share their stories, and spread awareness to those that don't understand what it is like to live with this sometimes invisible disease."

LAUREN JARMAN
2018 NATIONAL MG WALK HERO

"I have been involved with the MG Walk for 5 years including as the 2017 Georgia MG Medical Walk Chair. My patients, fellow physicians, nurses and staff at the Laureate Medical Group and Northside Hospital have all embraced what the MG Walk means to the MG community. Each year I am honored to walk alongside the many persons with MG and their family & friends. I strongly encourage the MG medical community from around the country to support the MG Walk."

GAVIN BROWN
2018 NATIONAL MG WALK MEDICAL AMBASSADOR

Funds raised from the MG Walk Campaign support important research toward a cure and better treatments for those living with MG.

If you or someone you know is experiencing sudden or gradually increasing symptoms of muscle weakness, it could be a sign of MG or another serious condition. Talk to your doctor if you are short of breath, have difficulty smiling, talking or swallowing, or cannot walk any distance without having to rest.
