MG patients and their families, friends, co-workers, and fellow community members rally together to participate, volunteer and donate. The MG Walk generates awareness, renewed hope and creates a community of care. MG patients connect and share their strength; enabled to talk about their illness – often for the first time — and experience an outpouring of support, concern and camaraderie.

We walk to help the MGFA fulfill its mission to find a cure for MG and closely related disorders, improving treatment options and providing information & support to people with MG through research, education, community program & advocacy.
