Imagine a debilitating disease that impacts every aspect of your life. Now imagine that no one has ever heard of your illness. This is what life can be like for people with myasthenia gravis (MG).

Myasthenia gravis is a chronic autoimmune disease in which antibodies mistakenly attack and destroy neuromuscular connections. This causes weakness in the muscles that control basic movements, including the ability to walk, swallow, blink, breathe and smile. Myasthenia gravis affects everyone in different ways.

Each day, tens of thousands of Americans of every race, gender and age live with these life altering symptoms. While there are treatments, there is currently no cure for MG.

The Myasthenia Gravis Foundation of America (MGFA) is the only national volunteer health organization in the United States dedicated solely to the fight against myasthenia gravis. With the money raised through the MG Walk, the MGFA can provide valuable funds for research, education, community programs and advocacy. The MGFA continues to support people with MG, their caregivers and families through many different ways, including:

• Promoting and funding research for MG
• Creating the MG Patient Registry
• Hosting the MG Conference annually
• Implementing and maintaining support groups across the country
• Launching the free myMG smartphone app
• Offering podcasts and webinar series to share information
• Funding an annual scientific session
• Funding and hosting an international symposium on MG and related disorders every five years

CORPORATE PARTNERS
We have provided a variety of opportunities for corporations to engage with the MG community and demonstrate their commitment to the communities in which they live as well as nationally. Opportunities include: National and Local MG Walk, MG National Conference, MG Scientific Session and Nationwide MG Programs. Please contact us to discuss combining multiple options.
